

Structural Engineer

InterMat seeks a talented and motivated Professional Structural Engineer to join our consulting team. The chosen candidate will play a crucial role in all phases of the design process, from conceptualization to implementation. You will collaborate closely with clients, engineers, and other stakeholders to create functional and creative designs. The ideal candidate should possess strong problem-solving skills, thoughtful technical insights, and a passion for leading projects, teams, and our clients.

Responsibilities:

- Prepare criteria, computations/analyses, specifications, drawings/sketches, cost estimates, and technical reports for the layout of structures and equipment in industrial and bulk material handling facilities.
- Perform calculations, including sizing various land and marine support structures. Proficiency and experience modeling structures in STAAD or RISA is required.
- Select and apply engineering techniques and principles to analyze and evaluate specific structures, data, or other features of projects that are potentially broad in scope and complexity.
- Be able to author, review, comment, and finalize project specifications and reports.
- Provide technical quality reviews and ensure adherence to quality control processes, codes, specifications, and standards.
- Assist designers and drafters in designing facility structural and marine systems to ensure the design conformance with applicable codes, standards, and client requirements.
- Conduct site visits to gather information, assess feasibility, and monitor construction progress.
- Coordinate and collaborate with project teams, including other engineering disciplines, designers, and contractors.
- Research applicable codes and regulations to ensure compliance with industry standards.
- Stay updated with current trends, technologies, and best practices in engineering and design.
- Participate and/or manage multiple projects simultaneously, ensuring adherence to deadlines and/or budgetary constraints.
- Prepare proposals, specifications, schedules, and cost estimates for engineering projects

Abilities:

- Work effectively with team members and clients across various projects, initiatives, and functions.
- A passionate and curious inquisitive learner.
- Self-starter, able to be self-managed and work with minimal supervision and direction
- Candidate must be an active listener who is not afraid to share contrarian points of view.

Qualifications:

- Bachelor's or master's degree in engineering from an accredited institution.
- Minimum of 2-5 years of work experience.
- Expertise/ knowledge of industrial systems, material handling support systems, and marine supports
- Must have a working knowledge of AutoCAD; 3D CAD skills are a bonus.
- Knowledge of applicable codes, regulations, and construction methods.
- Excellent problem-solving and critical-thinking abilities
- Strong written and verbal communication skills.
- Ability to work collaboratively in a team environment.
- Proven time management and organizational skills.

**Compensation:**

Depending on the successful candidate's background and experience, compensation for this position will consider the candidate's education, experience, technical skill, and expertise.

Job Location:

Houston, TX / Metairie, LA / Columbus, OH

Benefits:

We believe in recognizing and rewarding the contributions of our team members. In addition to a competitive salary, we offer a comprehensive benefits package, including:

- Extended Health Care
- Dental and Vision
- Life Insurance
- Disability Insurance
- 401K with Company Match
- Paid Time Off

Join our team at InterMat and embark on a rewarding journey of professional growth and fulfillment within a dynamic, growing company.
